## FTP in JMeter:

---

Firstly, we will use FTP URL, FTP User, Password as an online server to put file from my local site to Remote site while using Jmeter.

Here, what we are trying to do is we are putting the below file (Testfile0012.txt) from local machine to Remote site using Jmeter. Basically transferring file to remote server.

Phase 3	SMTP Sampler.jmx	30-10-2023 17:00	JMX File	11 KB
New Volume (D:)	Testfile0012.txt	31-10-2023 11:01	Text Document	1 KB
Phase3 Jmeter testi	View Results Tree.jmx	28-10-2023 22:54	JMX File	30 KB
