Selenium Sampler:

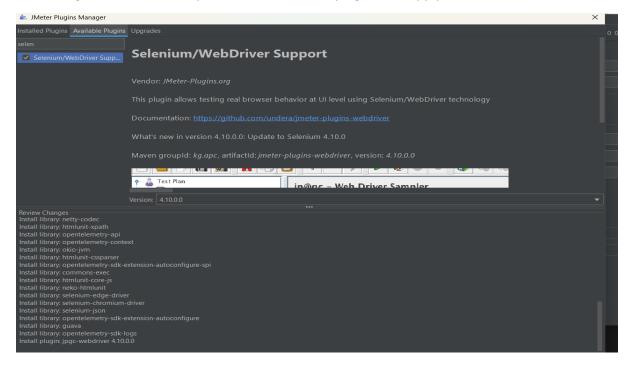

Firstly, We need to download plugin manager jar file for JMeter and add plugin manager to JMeter.

Which we can get from https://jmeter-plugins.org/wiki/PluginsManager/ -> however after downloading we need to copy this in JMeter folder -> lib-> ext folder -> restart jmeter.

Then from the below image we can find & apply any plugins which are needed

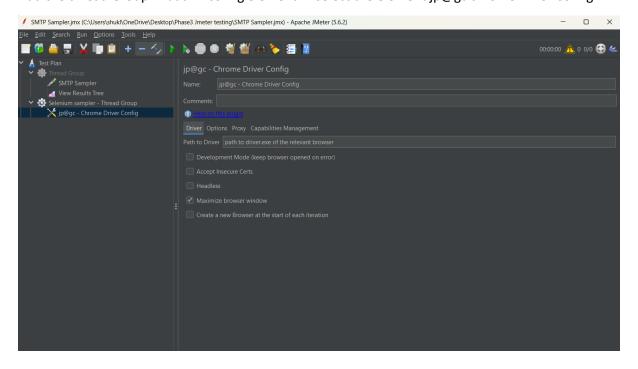

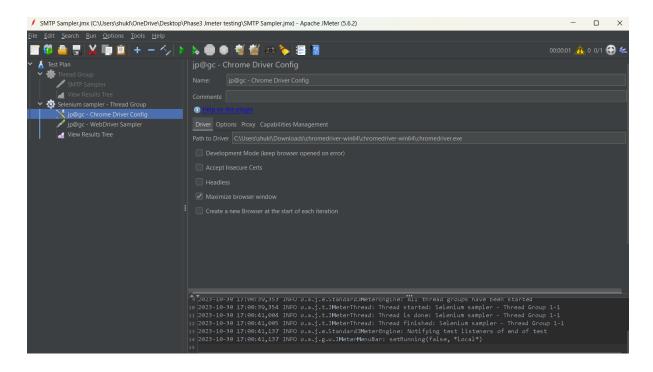

As working with selenium sampler we need selenium plugin to be apply in Jmeter:

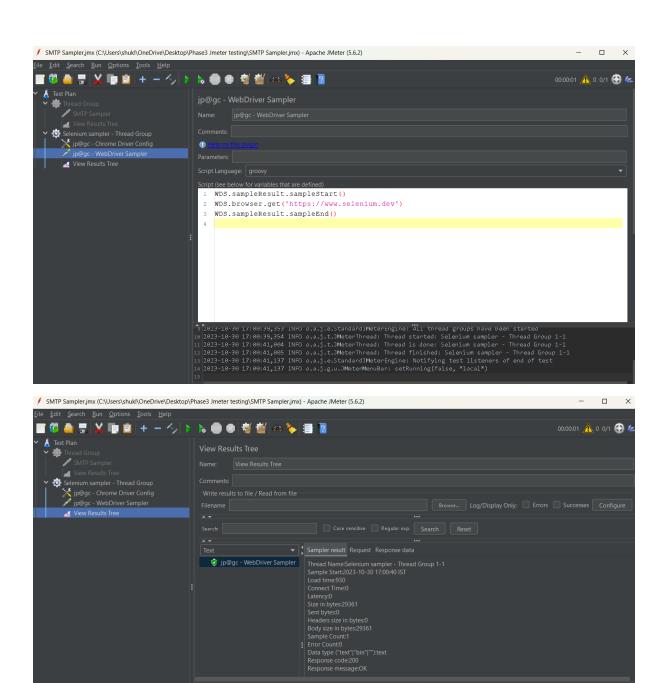

After the above step completed now we have to add selenium configuration in JMeter

Add the thread Group -> add -> config element -> select the element jp@gc chromeDriver Config
