Create a Collection.
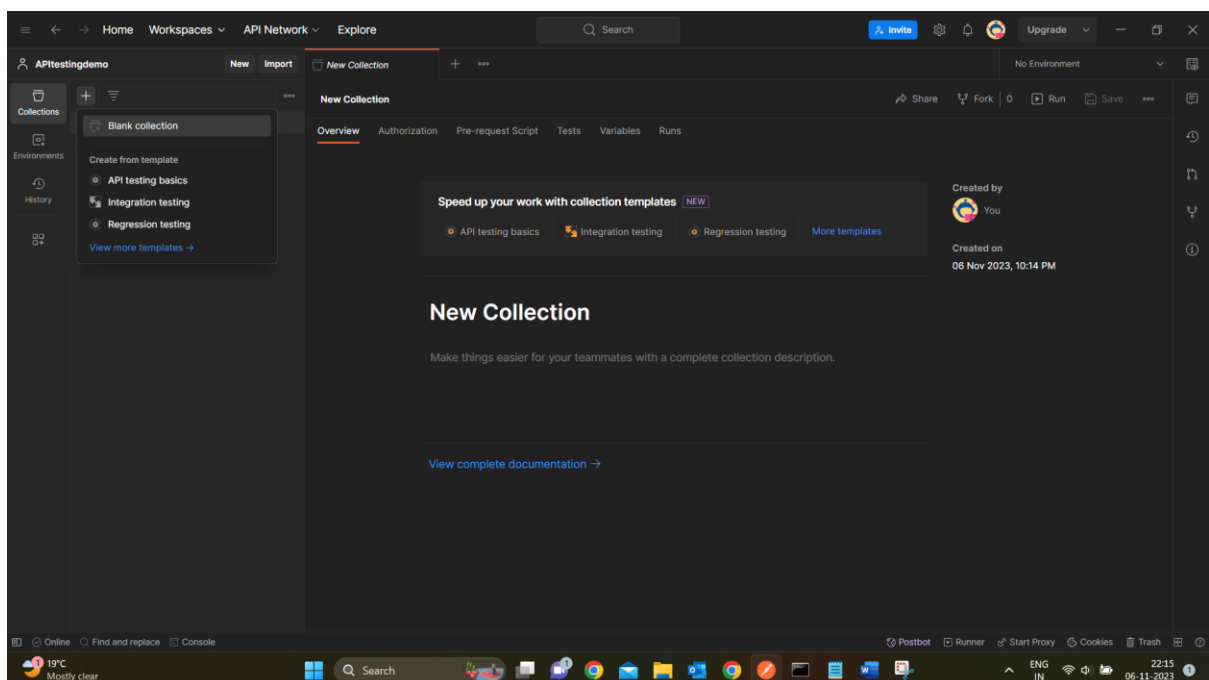

Here, while creating a collection the first step is to create a Workspace, which we can create as below
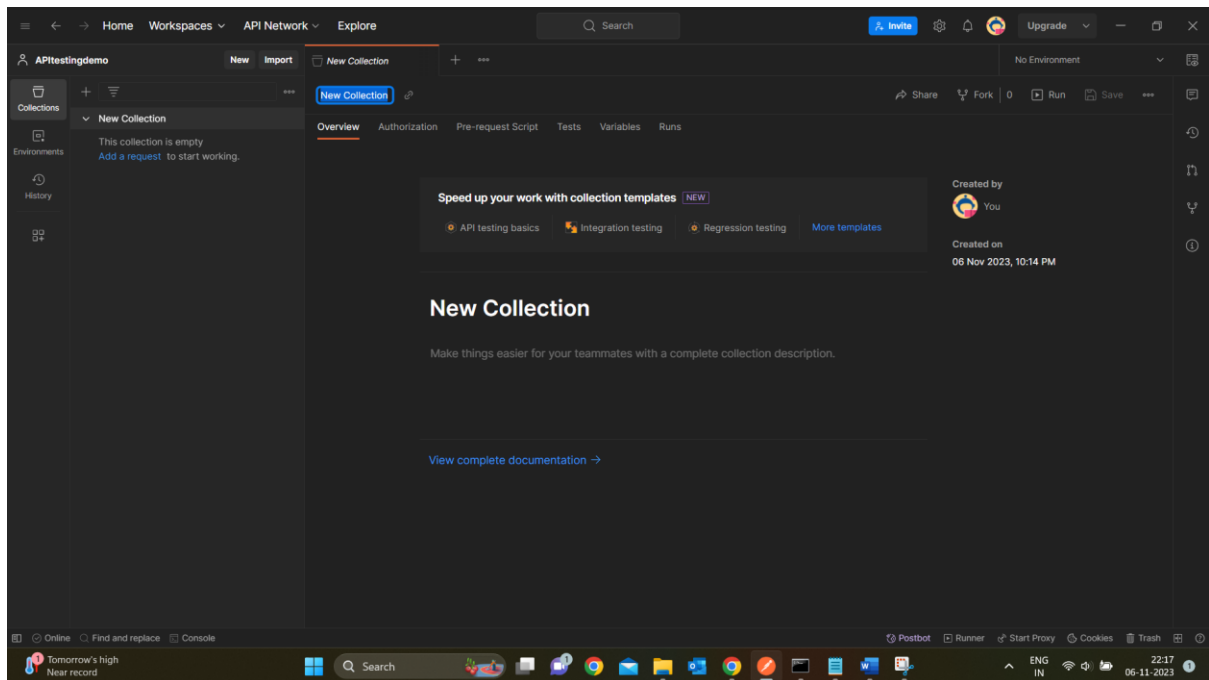

Click on Workspace -> Give the name to create workspace and -> click on create Workspace

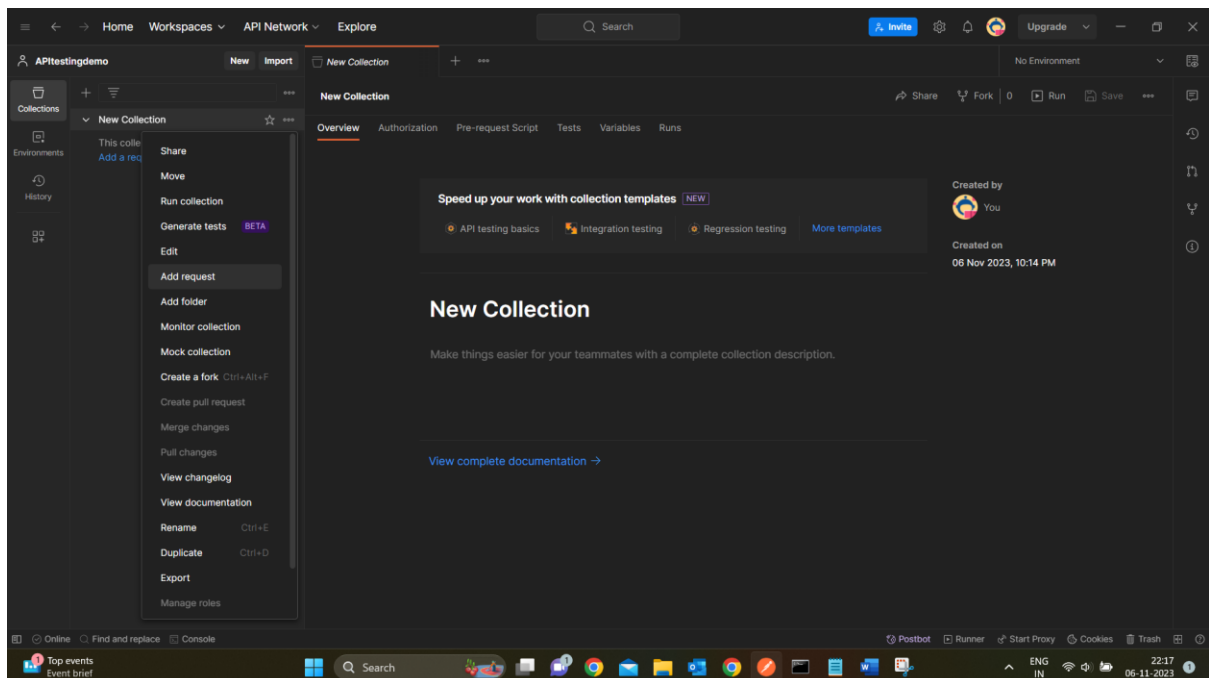

Now to Add collection we can click (+) symbol on left as shown on below screenshot.

Give a name to the collection on right side:

Inside which we will right click and Add Request as show below

Here below we can create a request and save it and then click on send for response output
